● big arms

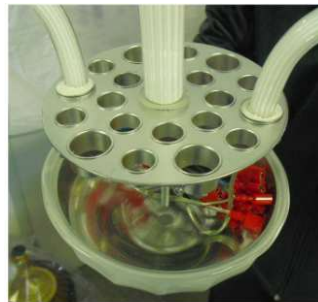

MOUNTING INSTRUCTION SERIE ART 2135\_CH18

- 1) Disconnect electrical power. Cable the ceiling cup.
- 2) Hook the suspension gear, paying your attention to avoiding damages at the external wires.
- 3) Move the ceiling cup towards the wall.
- 4) Assemble the fittings with suitable fixing dowels and screws, taking care that external wiring is not damaged during the installation. If the item is provided with the earthing connection clamp, fit the yellow/green wire and tightening the screws.
- 5) Fittings with power box and plastic pipe.
  - Fully insert the power cable inside the plastic pipe connecting the power to the wall.
  - Insert the single wires up to the end and block them up in the respect of the following symbology:  
L = live = brown cable, N = neutral = light blue cable
- 6) Safely tighten the screw placed on the ceiling cup.
